

Nashville IMC Club Monthly Meeting

This month's Nashville IMC Club meeting will focus on safe night flight operations. This month's scenario involves being on an IFR flight plan at night, and flying the visual approach. A visual approach can be a valuable tool for both the pilot and the ATC system. It can expedite traffic and save fuel while retaining an IFR clearance. However, visual approaches are not without risk. In the scenario, the weather is good VFR; it is a familiar airplane and familiar airspace. How then, did the scenario pilot almost fly a perfectly functioning airplane into the ground under good weather conditions? Ride along and see how you would handle this critical situation.

Directions: Meeting will be held in the offices of Nashville Flight Training. Please use map link to show location.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
